ONLINE SHOPPING SYSTEM

Subject-: System Analysis and design

ID-171442514

Md. Alamin Khan

Batch 44th,BSc in CSE
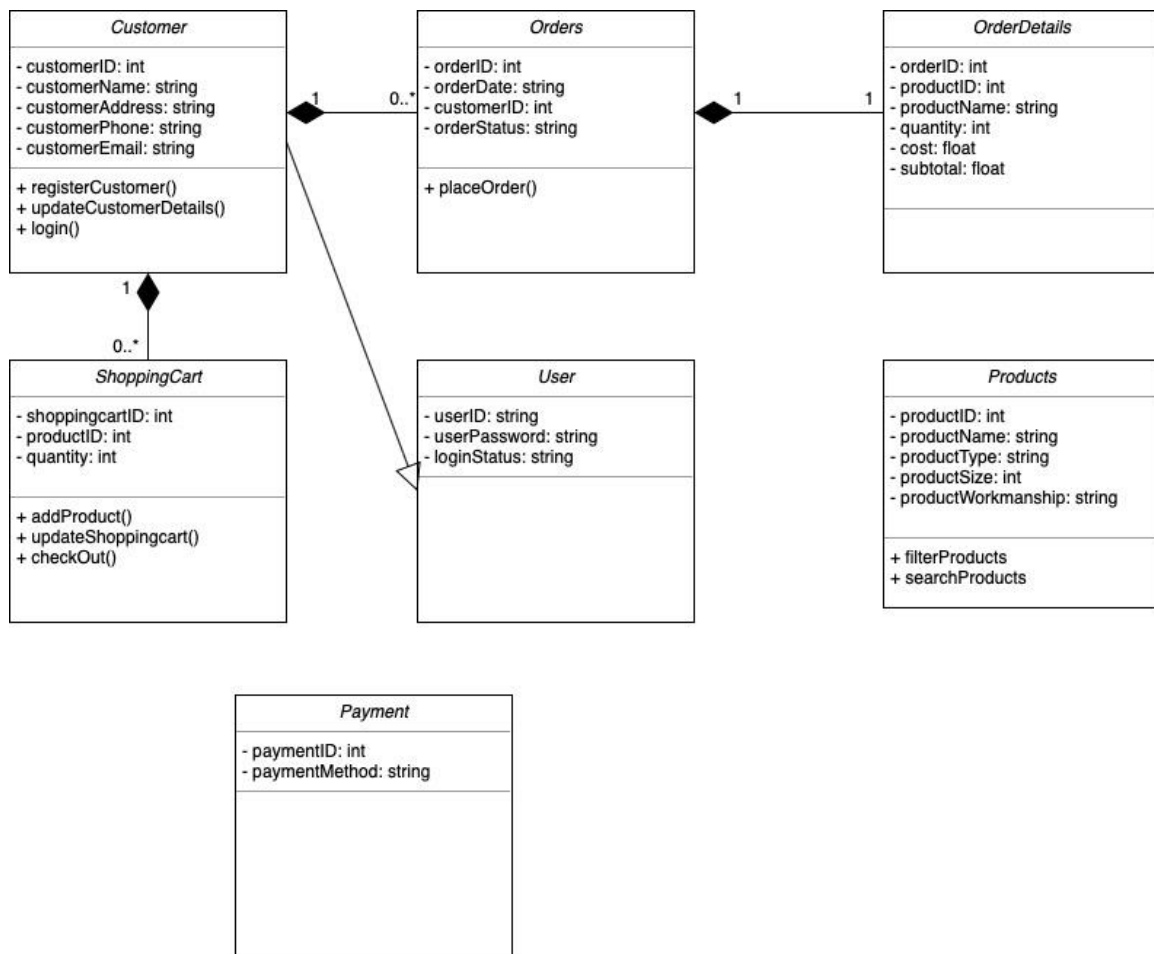

INTRODUCTION:

The aim of this project is on the online shopping application it is developed. The application is very useful where the buyer can directly buy the products from home via internet on mobile or system. The application reduces lot of work load for customer as well as owner. The transaction of money is completed in real time system. Some of the online shops are EBAY Amazon. By this online shopping the product is directly delivered to customer home.

ANALYSIS:

Study of the Problem

The Current shopping System is critical to set up online shops, customers to browse through the shops, and a system administrator to approve and reject requests for new shops and maintain lists of shop categories. This is a small scale project for Online shopping System. The basic idea is that the candidates can buy product from anywhere during any time.This Online shopping system involves with two types of users.

Class Design:

Objectives

The purpose of this document is to define the requirements of Online shopping system. This supplementary specification lists the requirements that are not readily captured in the use case model. Supplementary specification and the use case model capture a complete set of requirement of the system.
